

NOV 7 NOTES  
PI

How to get the egg into the cylinder? & how to get it back out? - By p.i

1. ice into bowl
2. ice cools down inside of cylinder
3. pressure inside drops to **Low**
4. **High** pressure outside wants to go inside
5. pushes egg in

1. HEAT AROUND cylinder with fire
2. Air inside gets hotter & particles start to move faster
3. pressure inside increases to **High**
4. **High** pressure inside wants out
5. it pushes on egg + it pops out

Pressure Naturally Flows

b/c it is easier to exist in **Lower** Less Pressure space
