How to get the egg IN
AND OUT? - By P.S

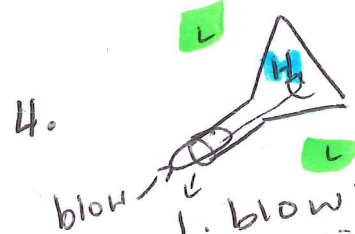

1. put ice in Bowl around cylinder
2. This cools + slows AIR inside = **Low**

1. Fire around cylinder
2. Heats up AIR inside - AIR begins to move faster AND particles bump into each other & walls of cylinder + egg
3. THIS pops egg

blow out **High** p . inside wants out!

3. **High** pressure air outside WANTS to go inside -
4. It pushes down on egg and egg pops in!

1. blow into cylinder
2. This adds more AIR inside
3. This creates **High** pressure
4. **High** pressure inside wants to escape
5. AIR pushes egg out!
